## We deliver worry-free IT management.

STSG's managed solutions take care of your IT environment so you can take care of your business.

Our certified experts and proven cloud management tools enable our team to monitor, secure and manage your computers, servers, network and business collaboration tools so you don't have to. And unlike other managed providers, STSG can help procure and proactively refresh your technologies thanks to our partnerships with industry-leading software and hardware providers.

We have been serving customers with **enterprise solutions** since 2007. Our tailored managed services include everything your business needs to fully leverage your technology investment:

- Regular review sessions to discuss IT system health and best-practice recommendations
- Priority access to manufacturer support
- Customized recommendations and budget planning sessions
- Concierge vendor license and support renewals
- Vendor training and system documentation

Business mail, calendars, docs and meetings from Microsoft 365.

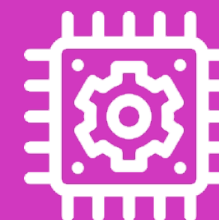

Real-time health monitoring and patches for Windows & Mac

Powerful Virus, Malware Protection and Backup for Windows & Mac

Secure, managed firewalls, networks and campus Wi-Fi solutions

Windows Active Directory and Cloud-Azure AD Management
